***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20, 41, and 42, drawn to a coated powder, classified in class 428, subclass 403.
  - II. Claims 21-40, drawn to a process of providing a hybrid coating on a cosmetic powder, classified in class 427, subclass 212.
  - III. Claims 43-47, drawn to a cosmetic product, classified in class 428, subclass 403.

***Distinctness***

The inventions are distinct, each from the other because:

2. Inventions I/III and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as a process wherein a slurry is dried by heat under vacuum *without* filtering the slurry.
3. Inventions I and III are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product, and the species are patentably distinct (MPEP § 806.05(j)). In the instant case, the intermediate product is deemed to be useful for preparing hydrophobic pigment for the use in solvent-based paints (not cosmetic products) and

Art Unit: 1762

the inventions are deemed patentably distinct because there is nothing on this record to show them to be obvious variants.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated is proper.

5. Claims 4, 12, 41 of Group I are generic to a plurality of disclosed patentably distinct species of properties: (i) hydrophobic and lipophilic properties (Claims 4, 5, 14, 41); hydrophobic and lipophobic properties (Claims 4, 14, 41). Applicant is required under 35 U.S.C. 121 to elect a **single disclosed species**, even though this requirement is traversed.

6. Claim 21 of Group II is generic to a plurality of disclosed patentably distinct species of order of adding functionalized silicon compound and the organometallate: (i) adding them simultaneously (Claims 22, 24-25); (ii) adding them sequentially (Claim 23). Applicant is required under 35 U.S.C. 121 to elect a **single disclosed species**, even though this requirement is traversed.

7. Claims 21, 24 and 29 of Group II are generic to a plurality of disclosed patentably distinct species of properties: (i) hydrophobic and lipophilic properties (Claims 25, 29); hydrophobic and lipophobic properties (Claims 25, 29, 37, 39). Applicant is required under 35 U.S.C. 121 to elect a **single disclosed species**, even though this requirement is traversed.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1762

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. A telephone call was made to Mr. Anthony H. Handal on June 7, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
